

Chest Drain Insertion Pads

These low cost pads have multiple layers representing skin, subcutaneous fat, fascia, muscle and pleura. Each pad is compatible with the whole insertion procedure.

The insertion pads features:

- multiple layers to mimic tissue layers of skin, subcutaneous fat, fascia, muscle and pleura
- realistic sensation of insertion from preping and infiltration of local anaesthetic through dissection to suturing and dressing
- located on the manikin in the 'triangle of safety' to reinforce appropriate anatomical positioning
- large enough for two insertions in adjacent rib interspaces on each pad
- low cost per use
- suitable for large bore trauma drains as well as small bore 'pigtail' drains
- easily replaced in seconds with a fresh pad for the next training session
- a larger tunneling pad and compatible manikin skin is available for insertion and tunneling of long term, small bore drains.

Pricing:

Insertion Pad	\$ 11
---------------	-------

Insertion Pad - Tunneling	\$ 22
---------------------------	-------

Prices are in Australian Dollars and do not include Duties, Taxes or Freight.
