

SimObs

An Observations Simulator for
enhancing patient scenarios.

A simple display of patient observations. Add blood glucose and temperature results to a manikin scenario or vital signs for patient actors. Use the hand held controller or a laptop to select from a bank of patients or change results “on the fly”.

Features:

- Numeric display of:
 - Respiration Rate
 - Oxygen Saturation
 - Pulse Rate
 - Blood Pressure
 - Blood Glucose
 - Temperature (°F/°C Selectable)
- The Controller has default patients pre-set in the device.
- Additional patients can be created to suit custom scenarios
- Each value can be changed “on the fly” or can be selectively disabled to simulate a missing piece of observation equipment
- The Controller can be connected to the MySimCentral PC application to more easily configure patients and select temperature units.
- Rechargeable AA batteries with built in charging
- Wireless range up to 30 metres
